SUMMARY

Junior Full-Stack Developer with hands-on experience in React, Next.js, TypeScript, Node.js, and PostgreSQL, trained through Hacktiv8's 480-hour AI Full-Stack JavaScript Bootcamp. Experienced in building and deploying full-stack web applications, with a focus on delivering reliable, user-focused software. JLPT N2-certified, with practical Japanese communication experience gained through nearly three years of on-site professional work in Japan, along with strong discipline, adaptability, and cross-cultural teamwork.

SKILLS

Languages: JavaScript, TypeScript

Front End & Mobile: React.js, Next.js, React Native, Expo, Redux Toolkit, HTML, CSS, Tailwind CSS, Bootstrap, DaisyUI, EJS

Back End: Node.js, Express.js, GraphQL, Apollo Server, Sequelize, RESTful APIs, Socket.IO

Databases & Caching: PostgreSQL, MongoDB, Redis

Testing & Tools: Jest, Supertest, Git, GitHub, Vite, Axios, Apollo Client

Cloud & Platforms: AWS EC2, Vercel, Supabase, Cloudflare

Integrations: Google OAuth, Google Gemini API, Midtrans, ImageKit

Others: JLPT (N2), Bahasa Indonesia

PROJECTS

Dolan — Social Travel & Trip Companion Web App

(September 2026)

A mobile-first full-stack PWA for travelers in Indonesia to discover destinations, plan trips and budgets, and connect with compatible travel companions.

- Built responsive **Next.js** interfaces for destination discovery, trip details, itinerary planning, and traveler profiles, with secure cookie-based authentication using a **BFF architecture** integrated with an Express backend.
- Developed destination search and AI-assisted itinerary planning using **Google Places** and **Groq**, including personalized recommendations, reusable trip templates, route planning, and estimated travel budgets.
- Implemented social and real-time collaboration features including public trip discussions, join/approval workflows, **Socket.IO** group chat, follow relationships, and post-trip peer reviews.
- Strengthened data reliability using shared **Zod validation schemas** and **PostgreSQL unique constraints** to prevent duplicate memberships, reviews, and follow relationships.

***Tech Stack:** Next.js, React, TypeScript, Tailwind CSS, Express.js, PostgreSQL, Sequelize, Socket.IO, Zod, Groq, Google Places API, REST API*

Link Demo: <https://app.dolanan.my.id/> | *Link Github:* <https://github.com/Dolan-Project/dolan-repo.git>

BeryBox — Community Reuse Web App

(August 2026)

A community reuse platform connecting individuals and organizations to donate, claim, and barter usable goods nearby, with real-time inbox chat, Midtrans courier checkout, Leaflet map discovery, AI-assisted matching, and a dedicated admin CMS for reports and organization verification.

- Built the user web app and a separate admin CMS using React, Vite, Tailwind CSS, and Redux Toolkit, integrating JWT/Google login, ImageKit uploads, and Leaflet maps for listing, discovery, and org verification.
- Implemented donation and barter flows in the React UI with Socket.io chat/notifications and Midtrans Snap checkout, covering claim approval, pickup or paid courier, tracking, reviews, and credit settlement.
- Extended the existing Express.js/Sequelize API with Gemini/Groq BeryBot and AI barter matching, then deployed the client/CMS to Vercel and the API to AWS EC2 while keeping 90%+ Jest/Supertest coverage.

Tech stack: React, Vite, Tailwind CSS, Redux Toolkit, Express.js, Sequelize, PostgreSQL, Socket.IO, Gemini, Groq, Midtrans, AWS EC2, Vercel.

RenAiFlix — Fullstack Movie Recommendation App

(August 2026)

An AI-powered movie platform that helps couples and friends discover films together through personalized genre matching, searchable catalogs with genre filters, personal watchlists with viewing status, and Premium subscriptions.

- Built React pages with Vite, Tailwind, and Redux for movie browsing, search, genre filters, and watchlists, served by an Express API that proxies TMDB for catalogs, details, and trailers.
- Developed a Gemini-powered AI matcher that recommends 5 shared films from two genres, with TMDB enrichment and daily usage limits, unlocking unlimited Premium access through Midtrans Snap and payment verification.
- Implemented JWT and Google authentication with ownership-protected Watchlist CRUD using bcrypt password hashing, Sequelize/PostgreSQL unique indexes, and 130+ Jest/Supertest tests at 90%+ coverage.

Tech stack: React, Vite, Tailwind CSS, Redux Toolkit, Express.js, Sequelize, PostgreSQL, JWT, Google Auth, TMDB API, Google Gemini, Midtrans Snap, Jest, Supertest, Vercel.

Mimoo — Ice Cream Catalog & Wishlist Web App

(August 2026)

A responsive full-stack web application for ice cream enthusiasts to discover flavors through searchable catalogs, category filters, product galleries, and personalized wishlists.

- Built server-rendered pages using Next.js and TypeScript, including dynamic metadata and Open Graph tags for product-specific link previews.
- Developed debounced product search, category filtering, and infinite scrolling with MongoDB pagination to provide a seamless browsing experience.
- Implemented JWT authentication and personalized wishlists using bcrypt password hashing, Zod validation, and MongoDB unique indexes to prevent duplicate accounts and wishlist entries.

Tech stack: Next.js, React, TypeScript, Tailwind CSS, MongoDB, JWT, bcryptjs, Zod, Motion, REST API.

EDUCATION

Full Stack JavaScript Immersive Program — Hactiv8

June 2026 – September 2026

Jakarta, Indonesia | [Transcript](#)

Bachelor of Information Technology — Dian Nuswantoro University

August 2024 – August 2028

Semarang, Indonesia (Online) | GPA 3.73 / 4.00

WORK EXPERIENCE

Ship Building Production Technician (Technical Intern) — Wakino Zousensho

June 2023 – April 2026

Kanagawa-ken, Japan

- Coordinated vessel hauling, positioning, and exterior repainting for fishing boats, speedboats, and yachts during the first year, using shipyard equipment and safety procedures to support daily maintenance operations.
- Fabricated and assembled FRP upper structures for fishing vessels during the second and third years, working in a two-person team with a Japanese senior technician and using grinders, drills, and other workshop tools to complete production tasks.
- Earned the trust to independently handle complex vessel repair and fabrication tasks under senior supervision, including repairing a yacht in a difficult-to-access area and rebuilding an extended section of a passenger boat's body from fabrication through final installation.
- Developed disciplined problem-solving, adaptability, and cross-cultural teamwork through nearly three years of professional experience in Japan, achieving JLPT N2 certification.
